

Sarah Tao, Ph.D. is the Senior Director of External Innovation for Biologics, Global Business Development & Licensing at Sanofi Partnering since July 2021. In this role, she is responsible for identifying, evaluating, and investing in external technologies that align with Sanofi's strategy for Biologics-based therapies. Dr. Tao joined Sanofi in 2017 with successive roles as Technology Lead for Biologics Research, and then Global External Technology and Innovation Lead for Large Molecules Research. Prior to Sanofi, Dr. Tao was a Senior Manager of New Technologies at CooperVision creating novel external research programs focused on advanced digital ophthalmic devices; and was also a Senior Member of the Technical Staff in the MEMS Design Group at Draper Laboratory leading programs in drug delivery and tissue engineering. She received her Ph.D. in Biomedical Engineering from Boston University and her B.S. in Bioengineering from the University of Pennsylvania. Dr. Tao has received numerous accolades for her contributions to the field of biomaterials and drug delivery, including the Controlled Release Society Eurand Grand Prize.
