

Yilong Zhou is currently a postdoctoral researcher at Lawrence Livermore National Laboratory. He attended Huazhong University of Science and Technology in Wuhan, China from 2009 to 2013 and obtained Bachelor of Science degree in Naval Architecture and Ocean Engineering. Subsequently, he received his Master of Science degree in Mechanical Engineering at Clemson University in 2016, where he investigated magnetophoretic and electrophoretic transport phenomena of particles in ferrofluids. After that, he received his Doctoral degree in Mechanical Engineering & Materials Science at Duke University in 2022, where he worked with Professor Gaurav Arya on using computational techniques to investigate the interfacial assembly of polymer-grafted nanoparticles.
