

James Ha is a Principal Scientist at Battelle Memorial Institute. In his current role at Battelle, he is responsible for developing and growing strategic business for the company's National Security, Health, and Cybersecurity groups. Working with a talented group of scientists and engineers companywide, he is creating innovative solutions for different defense (DoD) and intelligence (IC) customers' needs. Prior to Battelle, he was a Senior Scientist and Program Manager at Science Application International Corporation (San Diego, CA) and Leidos for twenty years, developing and executing programs for multiple US and UK government agencies. He has also worked as a Senior Advisor at Defense Threat Reduction Agency and at Aberdeen Proving Ground's Organization for the Prohibition of Chemical Weapons (OPCW) designated Forensic Analytical Center. Trained as a chemist and materials scientist, he received his MS in Chemistry from University of California, Los Angeles and his BS in Chemistry from University of California, San Diego.
