

Jamie Link

Jamie is Vice President of Product Management, Market Technologies at Avantus. She brings 20 years of experience in clean energy technology, markets, new product introduction, and product management. Jamie is passionate about leading cross-functional teams to develop innovative programmatic, technical, and commercial solutions to accelerate decarbonization of the global economy. Her contributions range from drafting the federal legislation to create the Department of Energy's Advanced Research Projects Agency (ARPA-E), launching new commercial business units in federal and distributed energy markets, and new product introduction of a wide range of hardware, software, and commercial innovations to advance market competitiveness of clean energy solutions.
